

CURRICULUM VITAE

Dr Christos E Christodoulides was appointed as the Director of the Transmission System Operator of Cyprus in 2010. Previously he was the Manager of Forward System Planning at the Electricity Authority of Cyprus. He is a Chartered Engineer (C.Eng) and holds the degrees of B.Sc (Hons), M.Sc and Ph.D. Dr. Christos E. Christodoulides is a member of the Assembly of ENTSO-E.

He is responsible for the optimum, safe and reliable operation of the Cyprus electrical transmission system and also for the forward planning of the transmission system so that it is developed and maintained in order to sustain the required efficiency and security of supply.

As the Director of the TSO, he is responsible for the management of the electricity market on an objective, non-discriminatory basis in a competitive environment.

He is also directly involved in the integration of renewable forms of energy into the Cyprus electrical system, in the effort to meet European Union requirements for green energy. The first wind farm was connected onto the Cyprus electrical system in mid 2010 and three wind farms, of total installed capacity of 135 MW are now in commercial operation.
