

Stine Grenaa Jensen, Ph.D.,

- Chairman of EURELECTRIC's working group Renewables
- Representative for Danish energy companies, mainly electricity companies. Fields of expertise are energy system analyses, support schemes for renewable energy, energy markets, and electricity production technologies.
- Extensive experience with both research in energy system analyses along with more practical and political work in relation to present occupation in the member organisation Danish Energy Association

Stine Grenaa Jensen is a Senior Economist in Danish Energy Association. The Danish Energy Association is a commercial and professional organisation for Danish energy companies. It is managed and financed by its member companies, mainly the electricity companies, and works to secure them the most free and favourable conditions for competition in order to ensure development, growth and welfare in Denmark.

Stine Grenaa Jensen has a history at Risoe National Laboratory as Senior Researcher within economic and technical assessment of renewable energy technologies. Her research areas included evaluation of policy instruments for regulating energy and environment.
