

DAVID PADFIELD – BIOGRAPHICAL DETAILS

David Padfield is the Operations Director of Jersey Electricity PLC and a Director of the Channel Islands Electricity Grid Company Limited. He is directly responsible for all activities of the core energy business in Jersey Electricity, which includes importation, transmission, generation and distribution, through to new business connections and metering. Jersey Electricity is the sole supplier of electricity to the Island of Jersey, which is located in the English Channel adjacent to the north west coast of France. Jersey Electricity has a full listing on the London Stock Exchange. The Channel Islands Electricity Grid Company operates submarine cable systems between France and Jersey; and Jersey and Guernsey and is contractual responsible for the bulk purchase of energy via the French Electricity Market.

David has some 40 years of experience in Power Engineering and Electricity Supply. He has considerable knowledge in submarine cable systems and operating island networks with large load densities and high levels of supply security. He has participated in several government forums, where he has promoted low cost sustainable energy policies which support affordable electricity tariffs.

David Padfield has been an active member of the EURELECTRIC “Small Islands” Group for over 10 years, during which time he has actively encouraged and supported a better understanding and co-operation between island electricity utilities to allow small and often fragile communities to meet the challenges of a “low carbon” future.

He is a Chartered Engineer, a Fellow of the Institution of Engineering & Technology (London); a Chartered Director and a Member of the Institute of Directors (London).
