### Curriculum Vitae

## Dominik Thumfart

Managing Director, Infrastructure & Renewable Energy

Dr. Dominik Thumfart is a Managing Director and Co-Head of Infrastructure & Renewable Energy Finance within Asset Finance & Leasing (AFL), a product group on the Global Credit platform of Deutsche Bank's Corporate and Investment Bank. AFL takes and manages credit risk in the infrastructure and renewable energy sectors: The business provides development and construction capital and arranges and underwrites long-term project debt financing. The team also arranges project equity and mezzanine debt on behalf of clients in the energy and transport sectors. In December 2011, Deutsche Bank was voted "Renewable Energy Finance House of the Year – Europe" by Environmental Finance and Carbon Finance Magazine for the second year in a row.

Prior to joining Deutsche Bank AG in November 2008, from January 2004 to October 2008, Dominik was a Managing Director of Citigroup and the EMEA Business Head of its Asset Finance Group, based in London. During his 15 years at Citigroup, Dominik occupied various business origination functions within the corporate and investment bank, the public sector group, structured corporate finance and fixed income.

Dominik holds a Master and Ph.D. in Business Administration from Wirtschaftsuniversität Wien (Vienna University of Economics and Business Administration) and a Master of European Management (CEMS) from Escuela Superior de Administración de Empresas (ESADE) in Barcelona.
