

## **Biography note**

### **Mr. Tomasz Dąbrowski**

Director of the Energy Department, The Ministry of Economy, Poland

Mr. Dąbrowski has both legal and technical education. He is also a professional civil servant that graduated from the National School of Public Administration.

Since 2008, Mr. Dąbrowski holds the position of the Director in the Department of Energy at the Ministry of Economy where he previously was the deputy director. He participated in drafting the government bills, which led to structural changes in functioning of electricity market, enhanced security of electricity supply and introduced the system of white certificates as a mean to promote energy efficiency investments in Poland.

Mr. Dąbrowski has also worked on the adaptation of the national legislation to the European Union legal requirements.

Now Mr. Dąbrowski is in charge of preparing the Energy Policy until 2050 and he is the head of department actively participating in works on climate and energy framework until 2030. Additionally he supervises the matters related to the functioning of the electricity market in Poland as well as the surveillance for secure operation of the National Power System.

He is fluent both in English and German, and speaks basic French.
