

Paul FIDDLER
Director of Operations
Energy Networks Association

Paul took up the role of Director of Operations for ENA in April 2013 looking after Engineering, Standards, Future Networks, Smart Metering and Safety, Health and Environment. He has over 22 year's experience in the electricity network industry, with 20 of those working for Scottish Power in various operational, design and asset management roles where he was instrumental in introducing Condition Based Maintenance techniques for 11kV and 33kV switchgear.

He joined ENA in April 2011 as Engineering Development Manager liaising with all network operators on matters associated with R&D and Smarter Networks including Heat Pumps and Electric Vehicles and he leads on the LCN Fund Conference and proposed Smart Networks Catalogues within the LCN Fund and Work Stream 5 frameworks. Paul also looks after street work matters and sits on the National Joint Utilities Group board as Safety and Policy Director. He holds a MSC (Distinction) in Electricity Management and Technology. Paul enjoys mountaineering, cycling and sea kayaking in his spare time
