| 12.00        | **Session II: Technology Battles - Providing Full-Scale Solutions for Europe**  
                Power companies and manufacturers will present in three parallel “Technology Battles” the latest state of the art storage technology solutions and report on innovation developments. They will battle it out to convince the audience that they have what it takes to provide solutions to the energy transition system challenges.  
                Panellists will present how their technology is capable of integrating variable renewables, how it offers a solution to the ever increasing system flexibility needs and how they can convince the customer?  
                Hydropower, batteries, compressed air energy storage, hydrogen, advanced nanotechnology, etc. What are you betting on?
